HIPAA Security Rule: Reference Guide

Expert Pabrai Addresses Definitions, Guidance & Audit Readiness

IRVINE, CALIFORNIA, USA – March 2, 2014: The HIPAA regulations require covered entities and business associates to comply with the HIPAA Security Rule. **The HIPAA Security Rule: Reference Guide** is a must have document that captures three core areas of information for each Standard defined in the mandate: *Definition, Guidance Questions* and *Audit Readiness*. No need to flip through a myriad of links and references, when you have it all in *one of the most colorful, compact and easy to use reference to comply with the HIPAA Security Rule*.

The *Audit Readiness* information associated with Standards and Implementation Specifications is valuable to address how prepared is your organization for a HIPAA audit. The Section on *Checklist* provides a high level summary of critical areas that must be addressed continually to ensure HIPAA compliance.

Brought to you by *HIPAA and cyber security expert, Ali Pabrai*, this PDF will save you time and provide you with all the specifics you need to further enhance your security and compliance program. For more details and to download **The HIPAA Security Rule: Reference Guide**, please visit www.ecfirst.biz.
