### Covered Entities

#### Definition

<https://www.hhs.gov/hipaa/for-professionals/covered-entities/index.html>

Individuals, organizations, and agencies that meet the definition of a covered entity under HIPAA must comply with the Rules' requirements to protect the privacy and security of health information and must provide individuals with certain rights with respect to their health information.

A Covered Entity is one of the following:

- A Health Care Provider
- A Health Plan
- A Health Care Clearinghouse

Health Care Provider

#### Helping Entities Implement Privacy and Security Protections

<https://www.hhs.gov/hipaa/for-professionals/training/index.html>

The HIPAA Rules are flexible and scalable to accommodate the enormous range in types and sizes of entities that must comply with them. This means that there is no single standardized program that could appropriately train employees of all entities.

Health IT.gov's [Guide to Privacy and Security of Electronic Health Information](#) provides a beginners overview of what the HIPAA Rules require, and the page has links to security training games, risk assessment tools, and other aids.
