HIPAA Privacy Rule

- Establishes federal standards to safeguard the privacy of personal health information.
- Gives patients an array of rights with respect to their medical information.
- Provides the foundation for the HIPAA Security Rule.

HIPAA Security Rule

- Emphasizes confidentiality, integrity, and availability of all (ePHI).
- Establishes national standards to protect individuals' ePHI that is created, received, used, or maintained by an organization.
- Requires appropriate safeguards to ensure the confidentiality, integrity, and security of ePHI.

  - Administrative Safeguards
  - Physical Safeguards
  - Technical Safeguards
  - Policies and Procedures and Documentation Requirements
  - Organizational Requirements

HITECH Breach

- Breaches must be reported to OCR.
- A breach is treated as discovered on first day the breach is known to the covered entity or business associate.

Managed HIPAA Compliance

- Industry best practice is to perform HIPAA security risk assessments annually. HIPAA assessment is a requirement.
- Organizations must include a comprehensive technical vulnerability assessment within the scope of the risk assessment.
- Talk to ecfirst about the Managed Cybersecurity Services Program (MCSP) that addresses risk analysis, policy development, training, on-demand consulting to remediate gaps, and more.
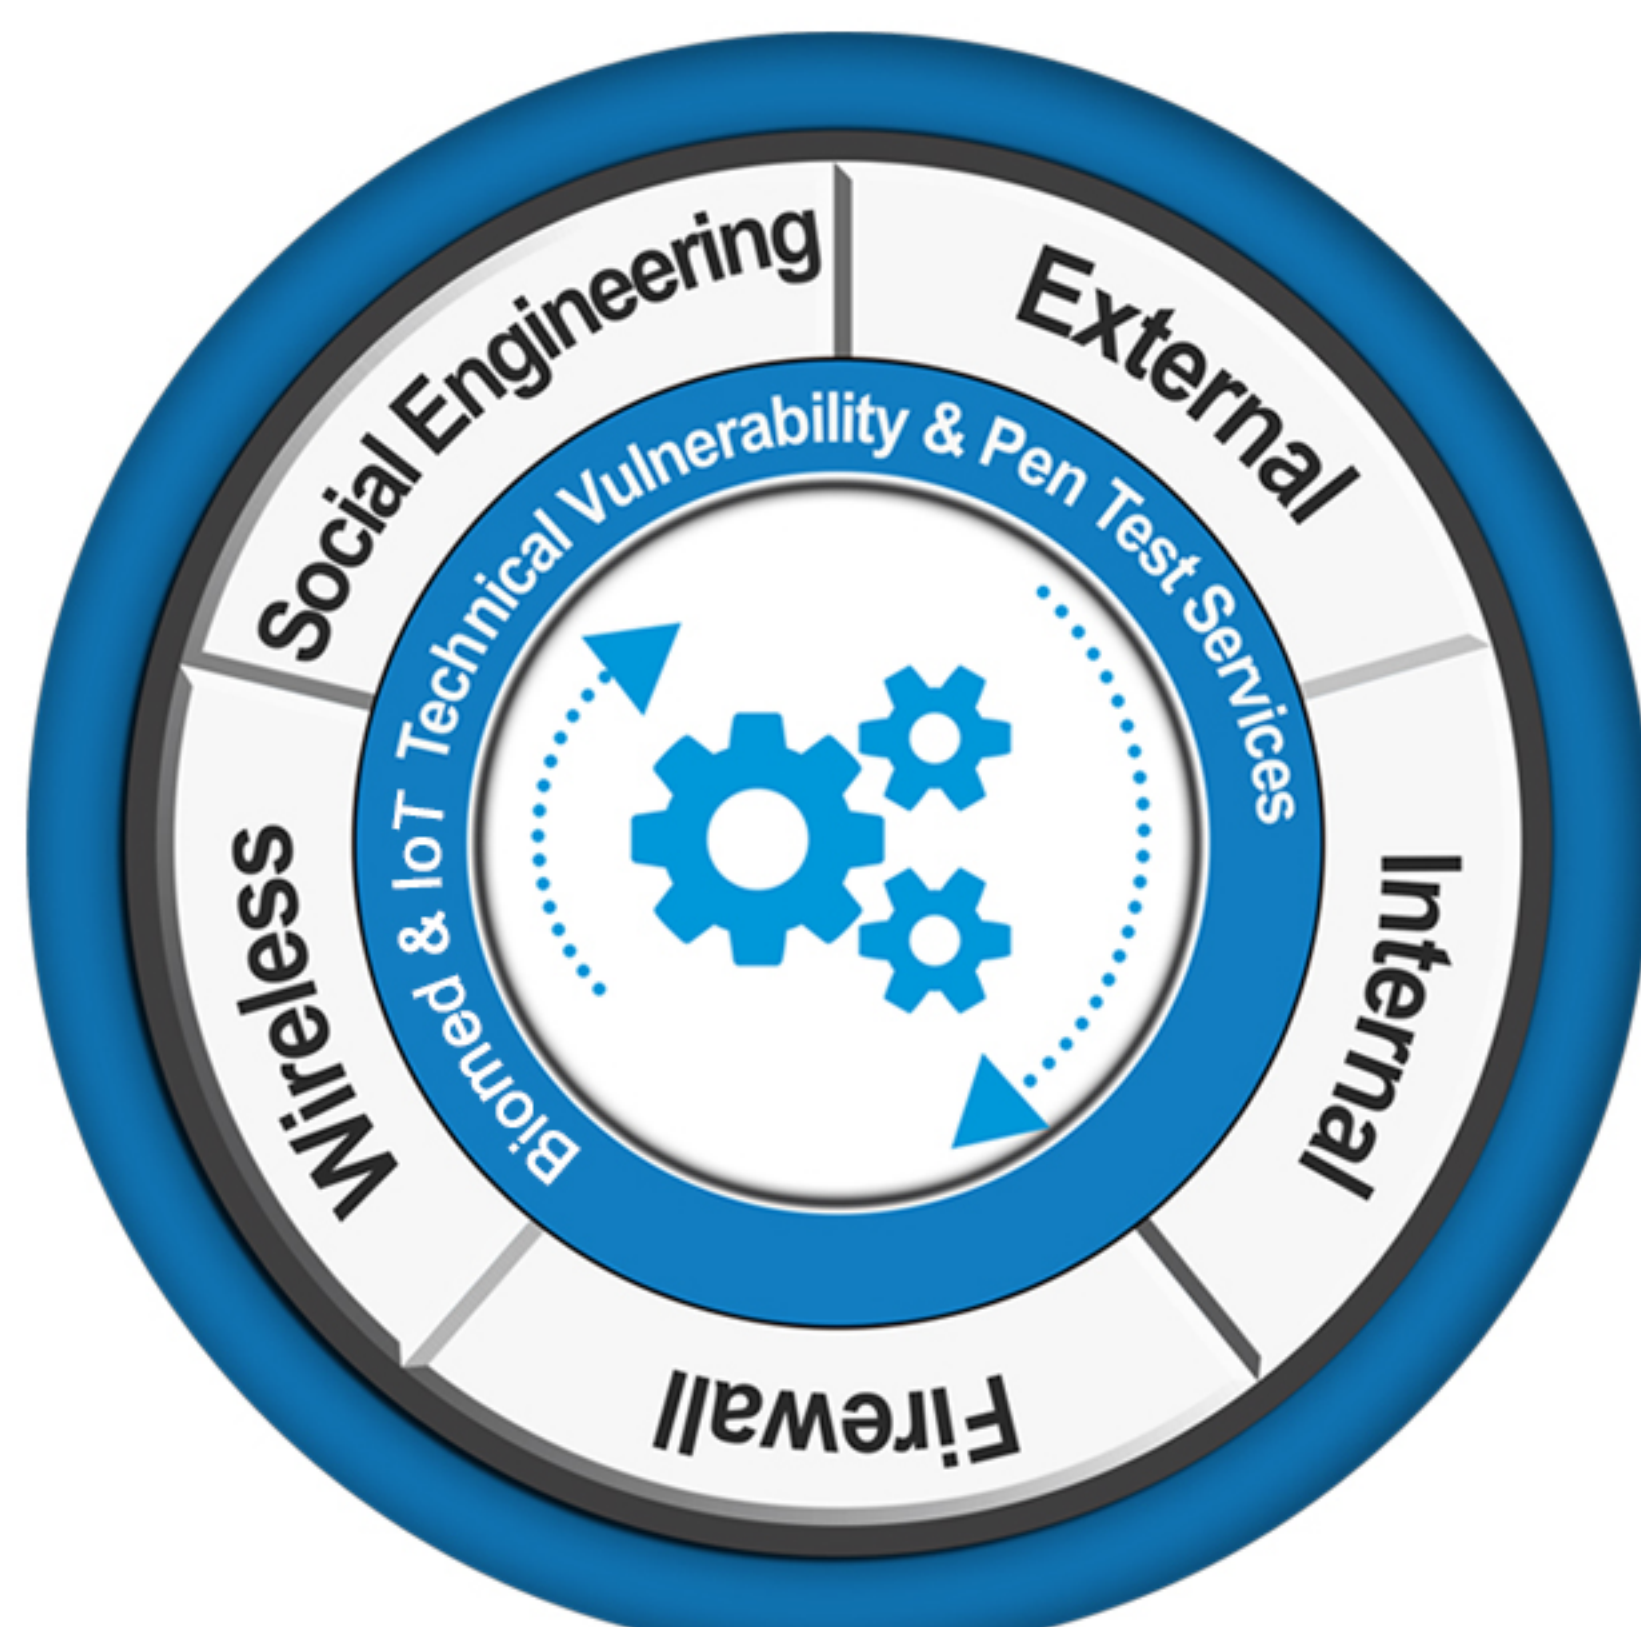

HIPAA Security Risk Assessment

Every organization must conduct a thorough and comprehensive assessment of the potential risk and vulnerability to the confidentiality, integrity and availability of all PII.
